# ORION

light up your stars

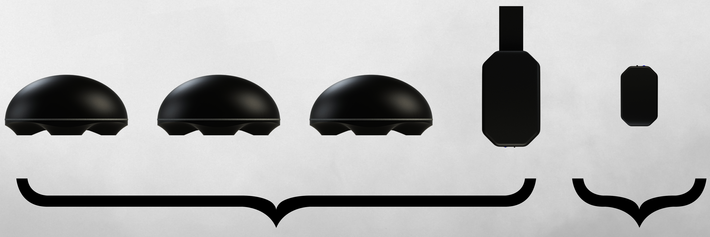
**ORION** is a system that upgrades any motorized light to one that can **automatically track** a performer on stage

## *why do you need it?*

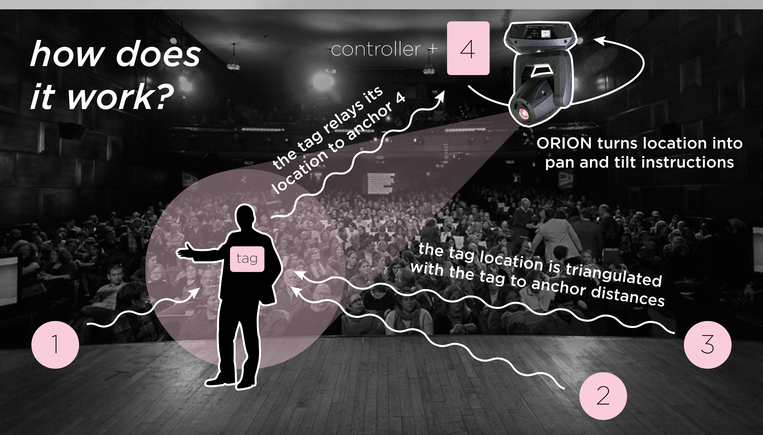
1. manual spotlights require a human operator, which takes up significantly more space than just the light itself

2. human operators are prone to error, and having an inaccurate spotlight is very noticable

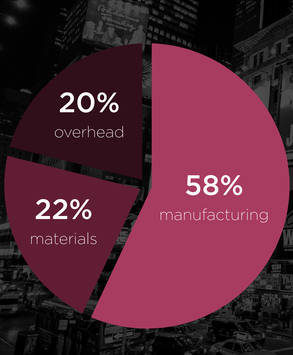
## *what's in the box?*



## *how does it work?*



## *how much does it cost?*



**ORION** will cost

**$1300**
