The coffee table with a twist

Elika presents a retractable for can stow under the couch or h the wall

Elika offers a space efficient alternative to the traditional coffee table. Its unique folding mechanism is stable when upright, but brings unmatched flexibility to your living space.

The hinges and legs are constructed from arbonate, stainless steel and aluminum.

### Hinge Design

Elika uses custom designed ball and socket joints with a curved path to constrain the movement of the legs.

### Locking

Elika can be locked in the upright or collapsed position with a simple twist of a knob.
