

Team Blue Code of Ethics

1. Honesty - We will only present results that we have experimentally proven and confirmed
2. Communication - Task forces will keep the team informed on progress and will be honest when admitting they are not meeting deadlines for deliverables
3. Work Ethic - Everyone will strive for an equitable workload on the team and the leaders will focus on this in determining task forces
4. Budget - We will budget for specific time lines and will not exceed our agreed upon budget without a team meeting confirming a need
5. Teamwork - We will work together, especially in task forces, to achieve our tasks, and we expect our teammates to do all they can to meet our end goals
6. Decision Making - We will make decisions as a group based on agreed selection methods (Pugh charts, etc) and will allot time for team discussion before making decisions
7. Behavior - We will respect others ideas and will evaluate proposals based solely on their merit
8. Co-ordination - We will work cohesively as task forces and will have open communication about availability and ability to help complete task
9. Purchasing - Purchases must be pre-approved by the financial office of your team in order to be reimbursed. Small purchases (<\$15) may be made without permission of the financial officer if they are urgently required.
10. Consider Environmental Impact of Construction - We will consider the environmental impact of our product and make an effort to minimize it
11. Health: Health and safety shall be a top priority in and out of lab. Tools and machines in lab should only be used if the team member knows how to use them or with assistance from a lab instructor. Safety goggles shall be worn at all times in lab, and team members should look out to be sure safety is being practiced.
