

Waste Washer

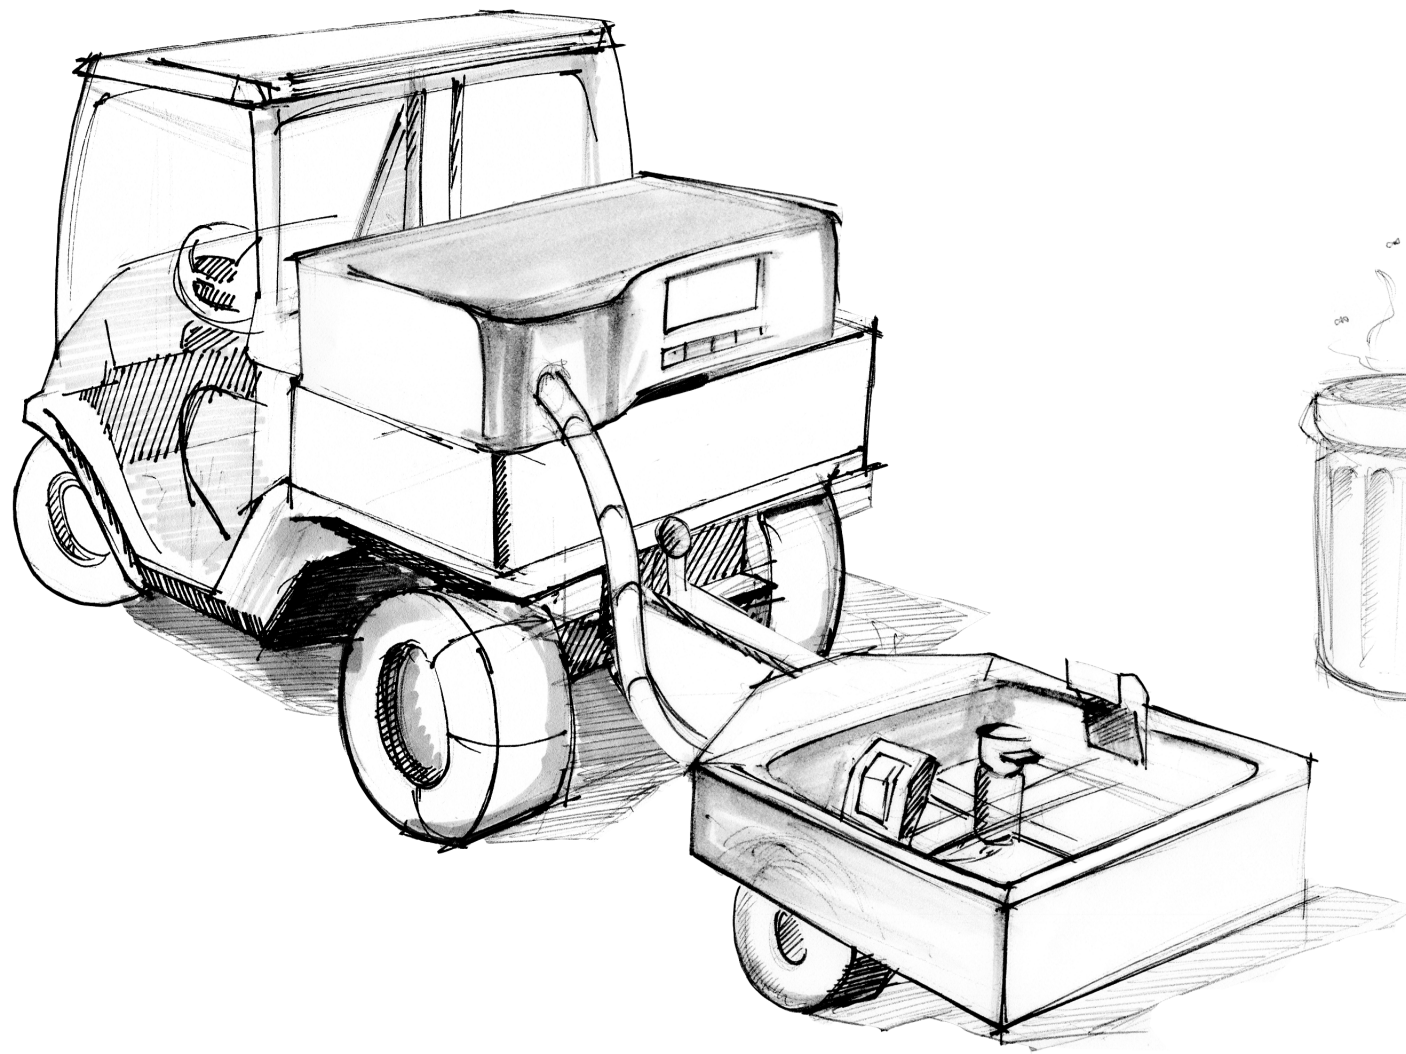

pink b

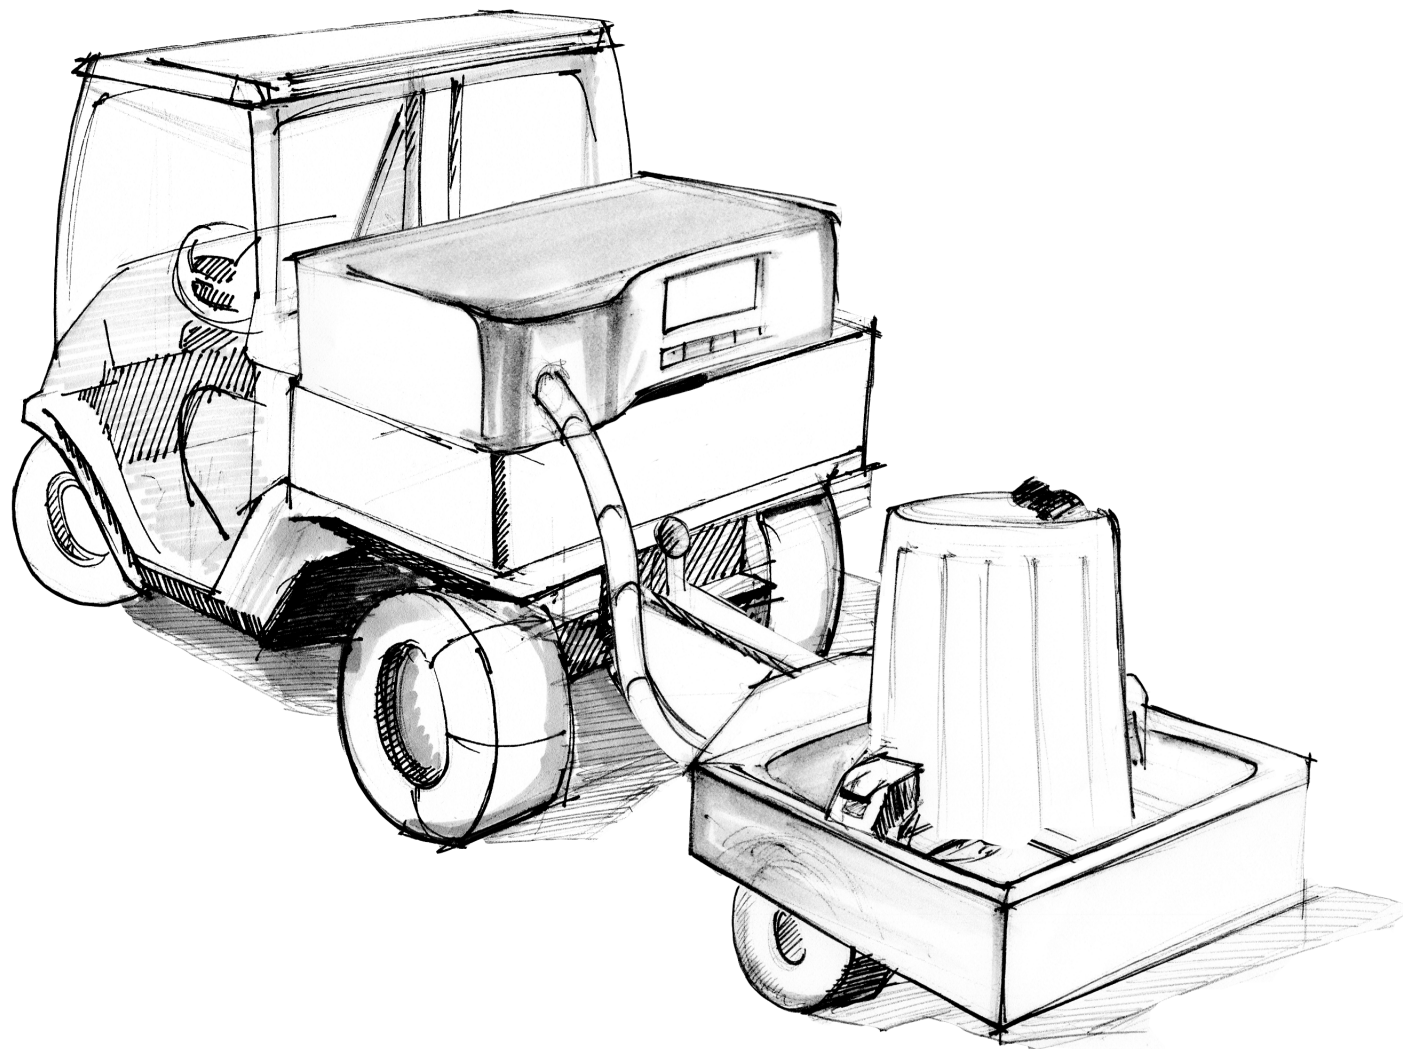

The Problem

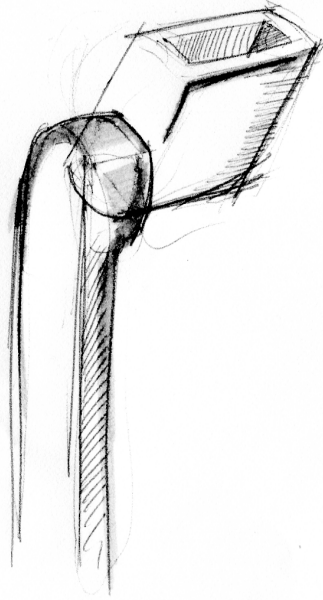

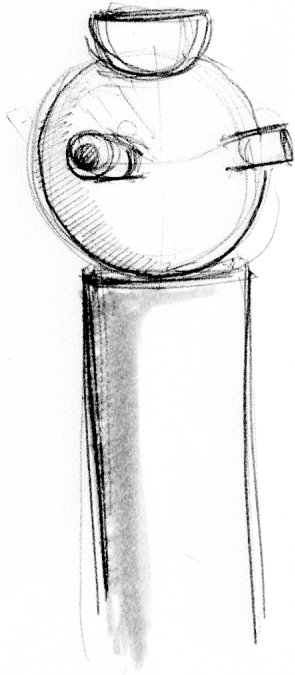

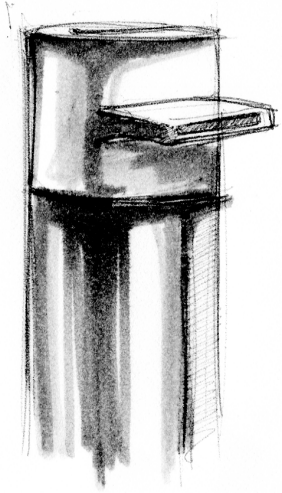

- * Large facilities and municipalities have numerous trashcans
 - * Washed by hand
 - * Unsanitary, often inefficient cleaning
- * Process of cleaning is slow
 - * Wastes water
 - * Time consuming

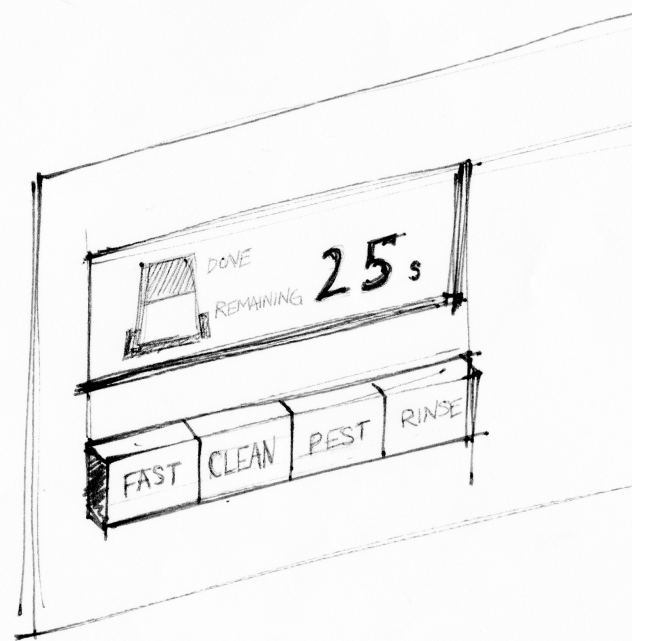

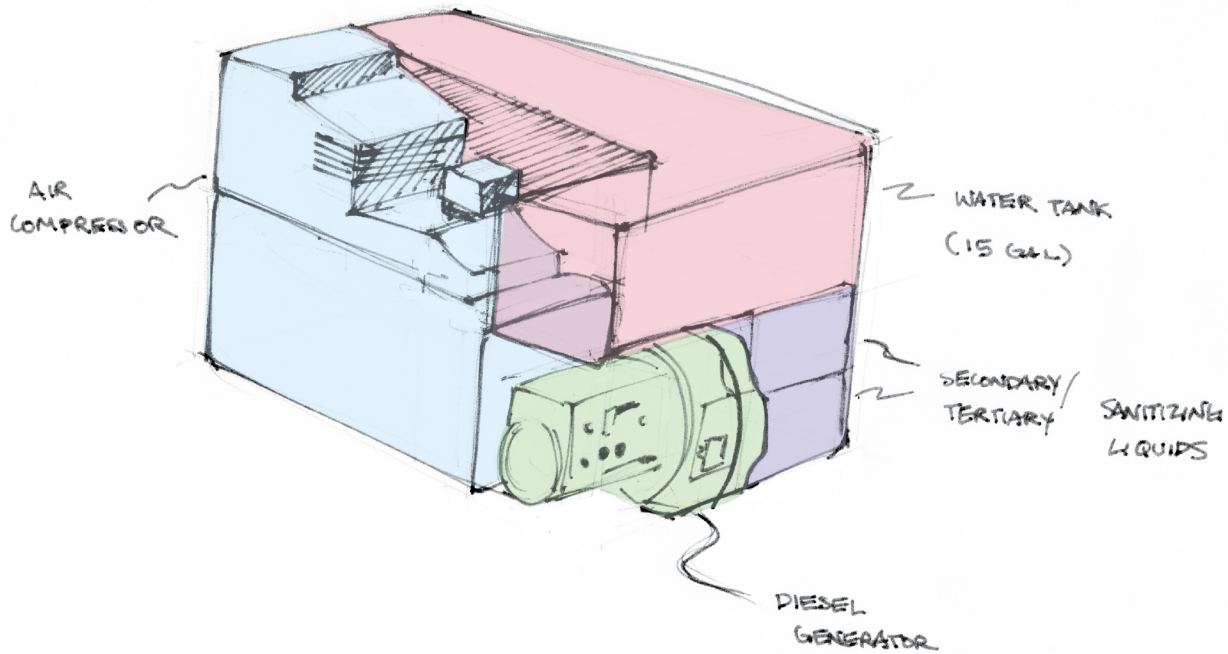

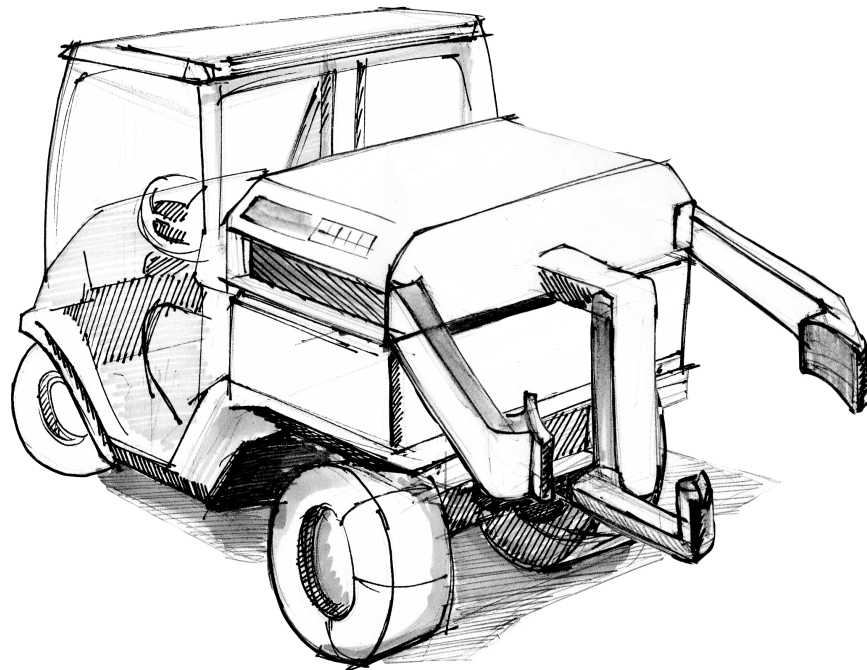

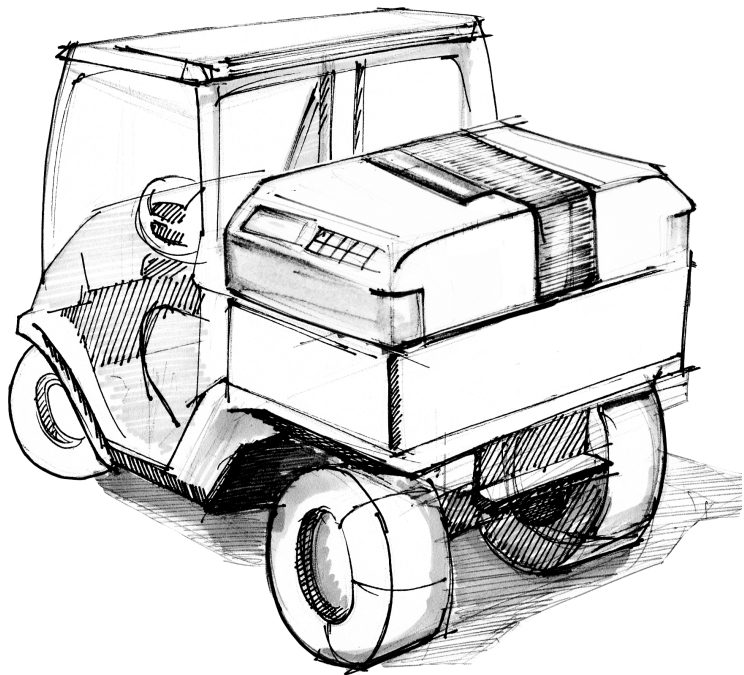

Our Solution

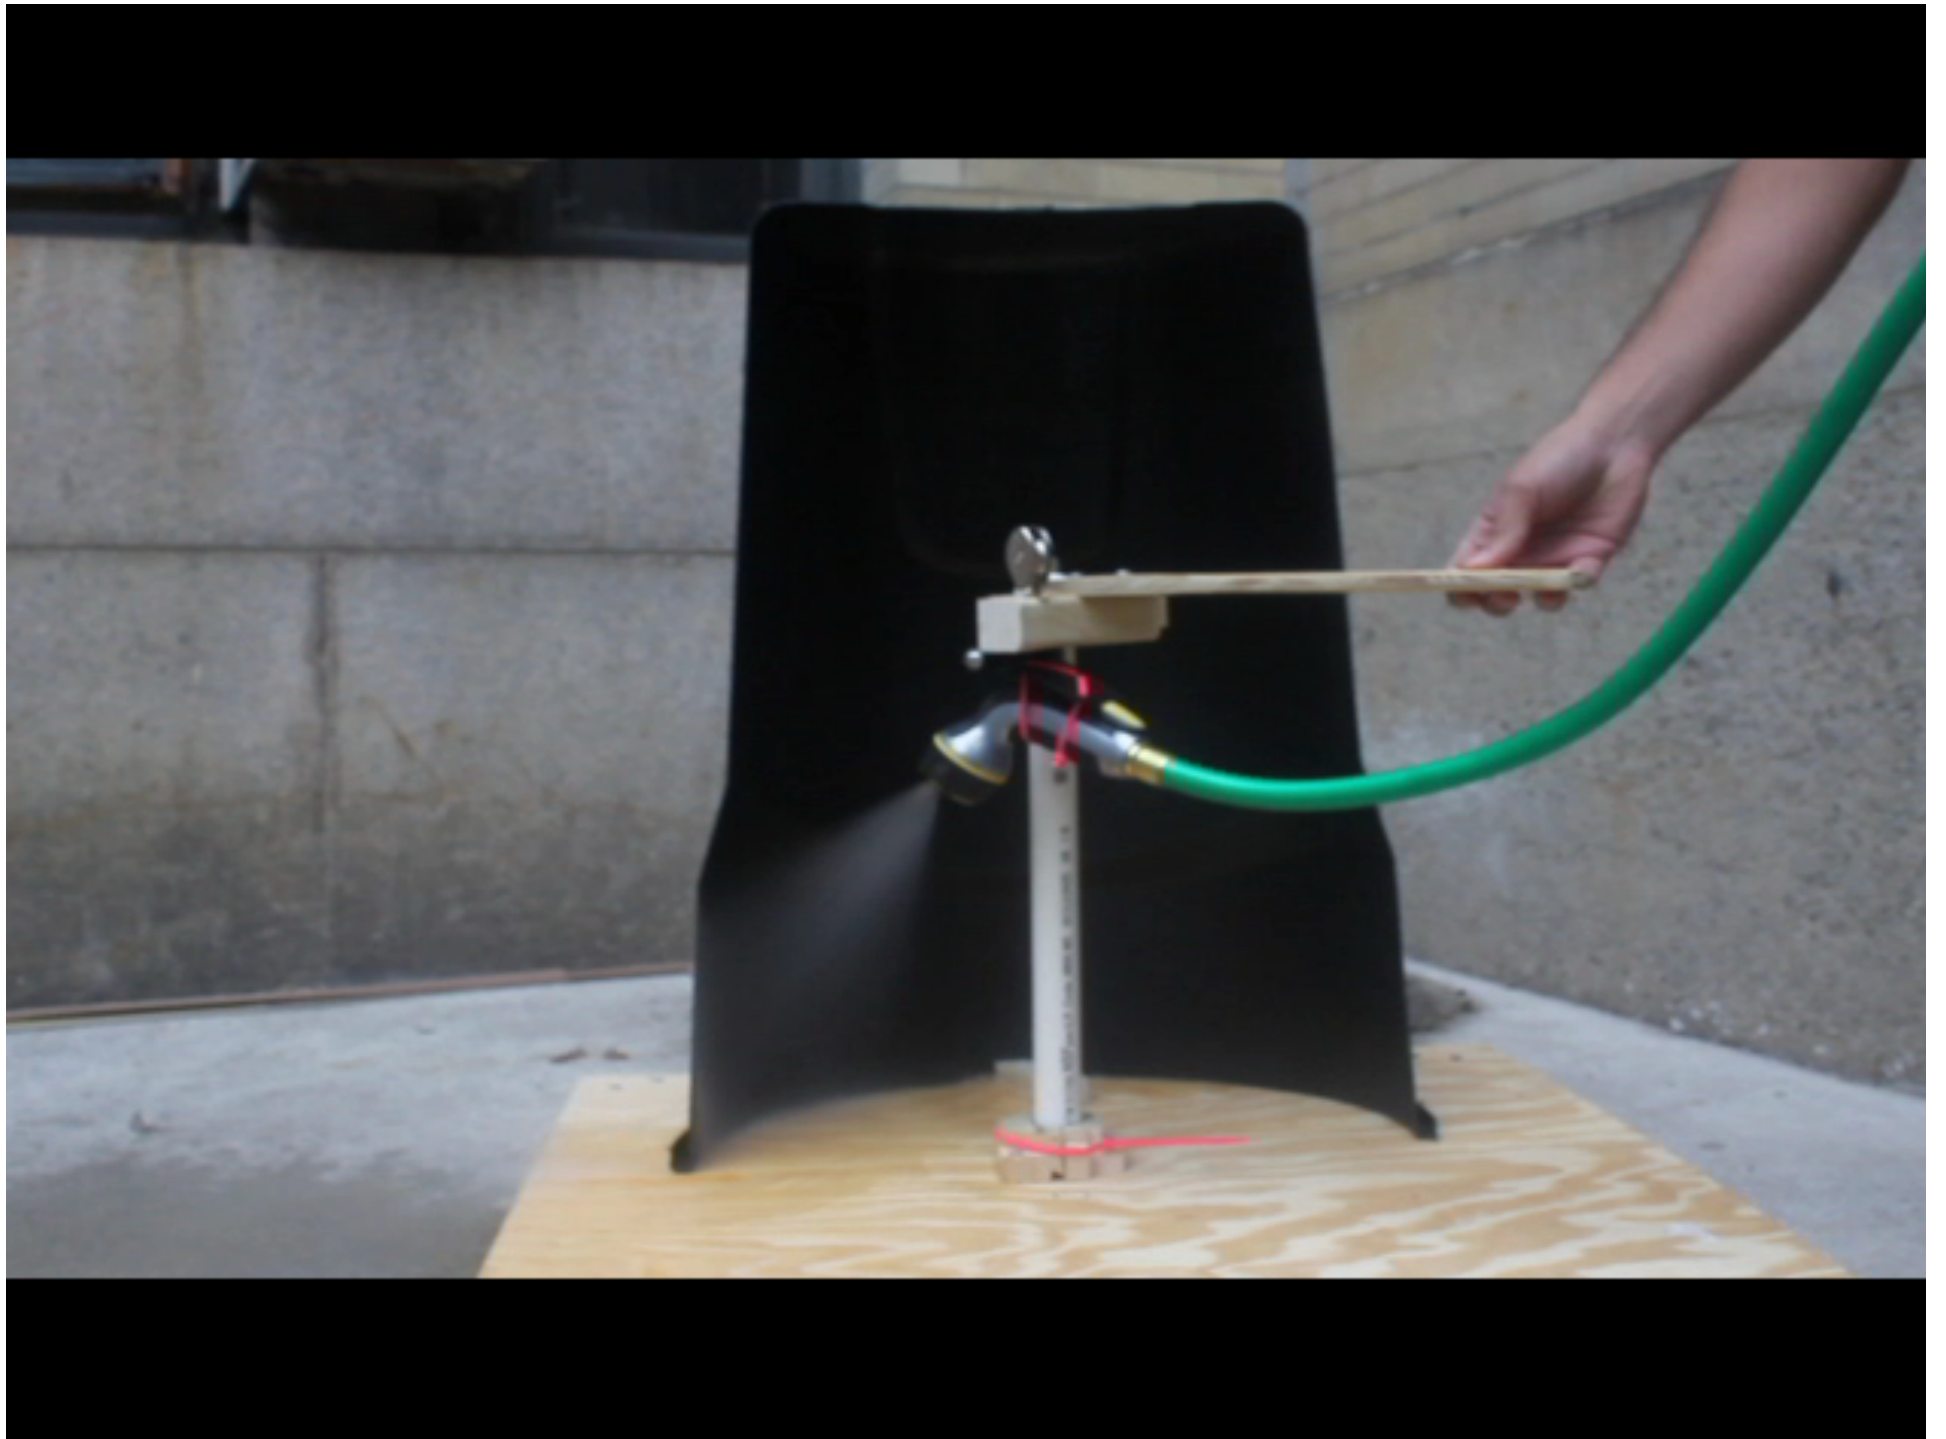

- * A portable, automated waste washing system
- * Attached to the back of a utility truck for easy transportation
- * Secures trashcan to the base, washing in seconds
- * Washes, sanitizes, and dries the trashcan
- * Multipurpose - works for all shapes and sizes

Competition

Cost	✓	✓	✗	✗	✗
Speed	✓	✗	✗	✓	✗
Effectiveness	✓	✗	✓	✗	✓
Water Usage	✓	✗	✗	✓	✓

Keys To Success

- * Portable, automated
- * Cost-effective
- * Water saving and fast
- * High-pressure with sanitation

Market Needs

- * From parks, municipalities, college campuses, small boroughs
- * Average household cleans trashcans once every six weeks
- * Cleaning services charge \$5 for every trashcan cleaned

Thank you!
